Matched EEGNet models in unseen participants viewing familiar videos
FACED: three 10-s windows; trial-averaged
FACED: one 30-s window
SEED-VII: three 10-s windows; trial-averaged
SEED-VII: one 30-s window
Trial balanced accuracy (%)
Session-only control (no EEG)
EEGNet
+ connectivity
+ recurrence
+ both
+ shuffled both
Primary training seed; 95% participant-bootstrap intervals conditional on fitted OOF models. Both window designs cover 30 s per trial.
